CSM[®]

(Certified Supply Manager)

About

In many companies, procurement, perhaps more than any other business functions is wedded to routine. Most of the procurement management skills were formed 20 years back in an era of relative stability, and they have not changed. Now especially after the recent pandemic, no company can lag behind to cope with disruptions. There is an urgent need to build resilience, agility, and flexibility in the procurement & supply chain. This certification program aims at transforming procurement from a Reactive to a Strategic Function.

Learning Objectives:

- Basic of Procurement
- Strategizing Procurement
- Strategic Sourcing
- Effective Negotiation
- Contract Management
- Supplier Relationship Management
- Future of Procurement (Digital Transformation)

CPSCM™

(Certified Professional in Supply Chain Management)

About

The Certified Professional in Supply Chain Management (CPSCM™) program offers a structured understanding of modern supply chain functions, strategies, and best practices. Designed for professionals in both public and private sectors, the course covers procurement, logistics, inventory, demand planning, and risk management. Updated for the digital era, the CPSCM™ promotes a shift from traditional to strategic supply chain management, supporting efficiency, transparency, and alignment with global standards.

Learning Objectives:

- Gain a solid understanding of the end-to-end supply chain process.
- Learn how to align supply chain strategy with business objectives.
- Understand best practices in demand planning, inventory control, logistics, and supplier collaboration.
- Explore digital innovations shaping the future of SCM (AI, IoT, blockchain).
- Develop a basic toolkit for identifying and mitigating supply chain risks.

Course Content

- Basics of SCM
- Strategy and Planning
- Sales & Operations Planning (S&OP)
- Sourcing & Procurement in SCM
- Operations Management
- Logistics Management
- Sustainable SCM
- Digital Transformation of SCM

The header features a dark blue background with a glowing blue globe in the center. The letters 'AI' are prominently displayed in a large, glowing blue font over the globe. Surrounding the globe are various white icons representing different aspects of technology and business, including a padlock, a smartphone, a bar chart, a cloud, a laptop, an envelope, a lightbulb, a globe, a gear, a speech bubble, a clock, a house, a Wi-Fi symbol, and a share icon. A hand is shown on the right side, pointing towards the 'AI' text. Below the 'AI' text, there are five yellow stars.

AIP™

(AI in Procurement)

About

This comprehensive course delves into the transformative role of artificial intelligence in procurement. You'll explore how AI can be applied across various procurement functions, from strategic sourcing and supplier management to contract negotiations and spend analytics. Through case studies and hands-on exercises, you'll learn how AI-driven insights can lead to better decision-making, cost reduction, and risk mitigation. By the end of the course, you'll be equipped with the knowledge to implement AI solutions that enhance procurement efficiency and drive business value

Learning Objectives:

- Understand the transformative role of AI in procurement functions.
- Explore AI applications in strategic sourcing, supplier management, contract negotiations, and spend analytics.
- Learn how AI-driven insights enhance decision-making, reduce costs, and mitigate risks.
- Gain hands-on experience with AI tools and technologies in procurement.
- Analyze real-world case studies and success stories.
- Acquire the knowledge to implement AI solutions for improved procurement efficiency and business value.

Course Content

- Overview & Setting the Context
- Introduction to AI in Procurement
- AI Technologies in Procurement
- Data Management
- AI Applications in Procurement
- Hands-On AI Tool Demonstration
- Case Studies & Success Stories
- Implementation of AI in Procurement
