CERTIFICATION
12 CEHs

TIMINGS
**11:30 AM –
5:30 PM IST**

Empower Procurement. Enable Sustainable Future.

2-DAY CAPABILITY BUILDING PROGRAM ON

SUSTAINABLE PROCUREMENT & ESG (ESF)

Transform Procurement. Build Responsible Supply Chains. Create Sustainable Value.

PROGRAM FOCUS • Climate & carbon management • Responsible and ethical sourcing • Supplier ESG performance • Circular economy and lifecycle value • Standards, reporting and implementation	PROGRAM SNAPSHOT • 30–31 July 2026 • 11:30 AM – 5:30 PM IST • Live Online via Zoom • 12 Continuing Education Hours • Recordings, templates and live Q&A
<i>“Every purchase order is a decision about the kind of supply chain — and the kind of planet — we choose to build.”</i>	

WHY THIS MATTERS

Sustainability is now a procurement mandate

Sustainable procurement is no longer just an ethical choice — it is a critical business strategy in today's interconnected global economy. With supply chains spanning continents, procurement decisions play a pivotal role in shaping environmental, social and ethical outcomes.

The Sustainable Procurement & ESG (ESF) Capability Building Program equips participants with the knowledge and practical skills to integrate sustainability into procurement processes, minimise carbon impacts, strengthen supplier responsibility and drive meaningful organisational change. The program also enhances professional credibility by demonstrating a practical commitment to responsible business and long-term value creation.

LEARNING OUTCOMES

What you will learn

01 Foundations of Sustainable Procurement Understand the principles and importance of sustainability in procurement.	02 Environmental Impact Assessment Learn techniques to evaluate and reduce the environmental impact of procurement decisions.
03 Social & Ethical Considerations Gain insights into addressing social and ethical challenges in global supply chains.	04 Sustainable Supplier Selection Explore strategies for sourcing from eco-friendly and socially responsible suppliers.

05 Regulatory Compliance Stay informed about international sustainability standards and legal requirements.	06 Lifecycle Costing Master sustainable cost analysis to balance economic and environmental goals.
07 Sustainability Reporting Develop skills to measure and report on sustainability performance effectively.	PRACTICAL • RELEVANT • IMPLEMENTABLE

PROGRAMME CURRICULUM

Eleven modules, one sourcing philosophy

From climate fundamentals to launching your own sustainability roadmap — a structured path across both programme days.

01	Introduction • Overview of Climate Change • Sustainable Procurement – What & Why • Global Trends & Net Zero • Benefits of Sustainable Procurement • Sustainable Procurement and UN SDGs
02	Strategic Aspects • SDG 12 (12.6 & 12.7) • National Environment Policy (2006) • General Financial Rules (GFR) 2017 • E-Procurement • Eco-Labels • BRSR & Sustainability Reporting • Scope 1, Scope 2 & Scope 3 Emissions • Net Zero Pathways • Zero Waste & Water Positive Strategies • ESG Investing

03

Needs Assessment

- Assessing Procurement Needs
- Buying for Functionality & Outcomes
- Alternative Procurement Approaches
- Stakeholder Involvement
- Needs Assessment Techniques
- Benefits of Effective Assessment

04

Sustainable Supplier Partnership

- Core Concepts
- Supplier Segmentation
- Strategic Integration
- Supplier Relationship Management (SRM)
- Practical Applications
- Partnership Objectives

05

Economic Aspects

- Cost-Benefit Analysis
- Economic Drivers for Sustainability
- Total Cost of Ownership (TCO)
- Life Cycle Costing (LCC)
- Economic Risk Analysis
- Innovation in Sustainable Procurement

06

Evaluation of Offers

- Green Specifications
- Eco-Labels
- BIS & BEE Standards
- Green Evaluation Criteria
- Supplier Collaboration
- Performance Measurement (KPIs)

07

Carbon Footprints & Circular Economy

- Global Sustainability Frameworks
- Greenhouse Gas (GHG) Management
- International Climate Goals
- Circular Economy Principles
- Waste Management
- Sector-Specific Applications
- Supply Chain Decarbonization

08

Role of ISO Standards

- ISO Standards Overview
- ISO 14001 – Environmental Management
- ISO 26000 – Social Responsibility
- ISO 20400 – Sustainable Procurement
- Eco-Labels (Type I, II & III)

09

Priority Sectors in Sustainable Procurement

- Priority Sectors
- Supply Positioning
- Selection Criteria
- Environmental Impact
- Green Supply Chains
- Industry Best Practices

10

Technology & Innovation

- Role of Technology
- Success Factors
- E-Procurement
- Digital Procurement Tools
- Blockchain
- Data Analytics
- Internet of Things (IoT)
- Artificial Intelligence (AI)
- 3D Printing

11

Launching Your Sustainability Journey

- Goal & Policy Development
- Stakeholder Engagement
- Supplier Assessment & Training
- Performance Measurement & Reporting
- Continuous Improvement
- Sustainability Roadmap
